■ Problem Description & Architecture:

This FAQ instructs user how to fix excel-in excel-out when see below error message.

■ Brief Solution - Step by Step:

1. Remove all AccessDatabaseEngine in control panel->program

2. Check WebAccess language, if WebAccess language is English
3. Open cmd
4. cd C:\WebAccess\Node
5. execute : AccessDatabaseEngineENG.exe /quiet
6. reopen project home, then you can use excel-in successfully.

Note: You can see AccessDatabaseEngineENG.exe under C:\WebAccess\Node
