Introduction
The FPM-5000G series provides 15", 17", and 19" flat panel color monitors. These TFT LCD displays with LED backlights are specifically designed for industrial applications. With LCD size from 15" to 19", they present ample display areas as well as sharp, vivid images. They feature Direct-VGA and DVI-D signal transmission, which allow VGA control cards to be used in your system. The onscreen displays allow users to adjust display output with two user-defined settings. The front-accessible USB connector provides easy access to the controller, and the industrial, 10-30 VDC, wide-range power support makes this product an excellent option for factory and machine automation display solutions.
