RISC All-In-One Mobile Data Terminal

## Copyright

The documentation and the software included with this product are copyrighted 2012 by Advantech Co., Ltd. All rights are reserved. Advantech Co., Ltd. reserves the right to make improvements in the products described in this manual at any time without notice. No part of this manual may be reproduced, copied, translated or transmitted in any form or by any means without the prior written permission of Advantech Co., Ltd. Information provided in this manual is intended to be accurate and reliable. However, Advantech Co., Ltd. assumes no responsibility for its use, nor for any infringements of the rights of third parties, which may result from its use.

#### Acknowledgements

TI and AM37x are trademarks of Texas Instruments..

Microsoft Windows is registered trademarks of Microsoft Corp.

All other product names or trademarks are properties of their respective owners.

## Product Warranty (2 years)

Advantech warrants to you, the original purchaser, that each of its products will be free from defects in materials and workmanship for two years from the date of purchase.

This warranty does not apply to any products which have been repaired or altered by persons other than repair personnel authorized by Advantech, or which have been subject to misuse, abuse, accident or improper installation. Advantech assumes no liability under the terms of this warranty as a consequence of such events.

Because of Advantech's high quality-control standards and rigorous testing, most of our customers never need to use our repair service. If an Advantech product is defective, it will be repaired or replaced at no charge during the warranty period. For outof-warranty repairs, you will be billed according to the cost of replacement materials, service time and freight. Please consult your dealer for more details.

If you think you have a defective product, follow these steps:

- 1. Collect all the information about the problem encountered. (For example, CPU speed, Advantech products used, other hardware and software used, etc.) Note anything abnormal and list any onscreen messages you get when the problem occurs.
- 2. Call your dealer and describe the problem. Please have your manual, product, and any helpful information readily available.
- 3. If your product is diagnosed as defective, obtain an RMA (return merchandize authorization) number from your dealer. This allows us to process your return more quickly.
- 4. Carefully pack the defective product, a fully-completed Repair and Replacement Order Card and a photocopy proof of purchase date (such as your sales receipt) in a shippable container. A product returned without proof of the purchase date is not eligible for warranty service.
- 5. Write the RMA number visibly on the outside of the package and ship it prepaid to your dealer.

Part No. Printed in Taiwan Edition 1 November 2013

### **Declaration of Conformity**

#### CE

This product has passed the CE test for environmental specifications. Test conditions for passing included the equipment being operated within an industrial enclosure. In order to protect the product from being damaged by ESD (Electrostatic Discharge) and EMI leakage, we strongly recommend the use of CE-compliant industrial enclosure products.

#### FCC Class B

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 FCC Rules.

Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference may cause undesired operation.

#### **RF Exposure Information**

This device meets the government's requirements for exposure to radio waves.

This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

This device complies with FCC radiation exposure limits set forth for an uncontrolled environment. In order to avoid the possibility of exceeding the FCC radio frequency exposure limits, human proximity to the antenna shall not be less than 20cm (8 inches) during normal operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

### **Technical Support and Assistance**

- 1. Visit the Advantech web site at http://support.advantech.com where you can find the latest information about the product.
- 2. Contact your distributor, sales representative, or Advantech's customer service center for technical support if you need additional assistance. Please have the following information ready before you call:
  - Product name and serial number
  - Description of your peripheral attachments
  - Description of your software (operating system, version, application software, etc.)
  - A complete description of the problem
  - The exact wording of any error messages

### Warnings, Cautions and Notes

Warning! Warnings indicate conditions, which if not observed, can cause personal injury!

**Caution!** Cautions are included to help you avoid damaging hardware or losing data. e.g.

There is a danger of a new battery exploding if it is incorrectly installed. Do not attempt to recharge, force open, or heat the battery. Replace the battery only with the same or equivalent type recommended by the manufacturer. Discard used batteries according to the manufacturer's instructions.

Notes provide optional additional information.

### **Document Feedback**

To assist us in making improvements to this manual, we would welcome comments and constructive criticism. Please send all such - in writing to: support@advantech.com

### Packing List

Before setting up the system, check that the items listed below are included and in good condition. If any item does not accord with the table, please contact your dealer immediately.

- TREK-722/ TREK-723 Mobile Data Terminal
- Warranty Card
- "Drivers, utilities, and user manual" CD-ROM
- End User License Agreement (WinCE), please download driver and relative document from http://support.advantech.com
- Power Cable

# **Ordering Information**

### **Safety Instructions**

- 1. Read these safety instructions carefully.
- 2. Keep this User Manual for later reference.
- 3. Disconnect this equipment from any AC outlet before cleaning. Use a damp cloth. Do not use liquid or spray detergents for cleaning.
- 4. For plug-in equipment, the power outlet socket must be located near the equipment and must be easily accessible.
- 5. Keep this equipment away from humidity.
- 6. Put this equipment on a reliable surface during installation. Dropping it or letting it fall may cause damage.
- Do not leave this equipment in an environment unconditioned where the storage temperature under -30° C (-22° F) or above 70° C (158° F), it may damage the equipment.
- 8. Do not operate this equipment in an environment temperature may over 70° C (158° F). The surface temperature of metal chassis may be scorch and hot.
- 9. Make sure the voltage of the power source is correct before connecting the equipment to the power outlet.
- 10. Position the power cord so that people cannot step on it. Do not place anything over the power cord. The voltage and current rating of the cord should be greater than the voltage and current rating marked on the product.
- 11. All cautions and warnings on the equipment should be noted.
- 12. If the equipment is not used for a long time, disconnect it from the power source to avoid damage by transient overvoltage.
- 13. Never open the equipment. For safety reasons, the equipment should be opened only by qualified service personnel.
- 14. If one of the following situations arises, get the equipment checked by service personnel:
  - The power cord or plug is damaged.
  - Liquid has penetrated into the equipment.
  - The equipment has been exposed to moisture.
  - The equipment does not work well, or you cannot get it to work according to the user's manual.
  - The equipment has been dropped and damaged.
  - The equipment has obvious signs of breakage.

- 15. This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions:
  - (1) this device may not cause harmful interference, and
  - (2) this device must accept any interference received, including interference that may cause undesired operation.
- 16. CAUTION: Always completely disconnect the power cord from your chassis whenever you work with the hardware. Do not make connections while the power is on. Sensitive electronic components can be damaged by sudden power surges.
- 17. CAUTION: Always ground yourself to remove any static charge before touching the motherboard, backplane, or add-on cards. Modern electronic devices are very sensitive to static electric charges. As a safety precaution, use a grounding wrist strap at all times. Place all electronic components on a static-dissipative surface or in a static-shielded bag when they are not in the chassis.
- 18. CAUTION: Any unverified component could cause unexpected damage. To ensure the correct installation, please always use the components (ex. screws) provided with the accessory box.

### **Safety Precaution - Static Electricity**

Follow these simple precautions to protect yourself from harm and the products from damage.

- To avoid electrical shock, always disconnect the power from your system chassis before you work on it. Don't touch any components on the main board or other cards while the system is on.
- Disconnect power before making any configuration changes. The sudden rush of power as you connect a jumper or install a card may damage sensitive electronic components.

Warning! 1. Input voltage rated: 6 ~ 36 Vdc (12/24V power).

- 2. Transport: carry the unit with both hands and handle with care.
- 3.
  - Maintenance: to properly maintain and clean the surfaces, use only approved products or clean with a dry applicator.
     SD/SIM card: Turn off the power before inserting or removing the
  - 4. SD/SIM card: Turn off the power before inserting or removing the storage cards.

# **General Information**

This chapter gives background information on the TREK-722/723 Mobile Data Terminal.

- Sections include:
- Introduction
- General Specifications
- Dimensions

### 1.1 Introduction

TREK-722/723 is a RISC platform with 5"/7" display all-in-one Mobile Data Terminal (MDT). The radio frequency options and programmable function keys make TREK-722/723 suitable for local fleet management. It is designed with vehicle power compliant to ISO7637-2 & SAE J1113 ensuring the system is stable in dirty car power system. With Suspend/Wakeup feature, TREK-722/723 supports 24/7 monitoring mechanism by periodical, digital input & WWAN wakeup.

## **1.2 General Specifications**

#### **Key features**

- 5" & 7" LCD (800 x 480) with resistive touchscreen
- 24/7 monitoring & reporting
- Cortex-A8 TI AM3703 800 MHz
- WinCE6.0 & optional Android 2.3.4
- Built-in CAN bus with J1939 protocol
- Built-in GPS with AGPS feature, BT, CDMA/GPRS/HSPA+
- Operating temperature: -20 ~ 60° C (5") & -30 ~ 70° C (7")
- Storage temperature: -30 ~ 80° C

#### Specifications

- Dimensions: 165 x 115 x 43 mm (TREK-722) / 213 x 145 x 43 mm (TREK-723)
- Weight: 650 gram (TREK-722) / 850 gram (TREK-723)
- Power feature:
  - Input Voltage: 6~36Vdc
  - Supports power on delay (default 2 seconds)
  - Supports power off delay (default 5 seconds)
  - Supports hardware power off delay (default 30 seconds)
  - Supports WWAN wake up
- SoC: TI ARM Cortex-A8 AM3703 800 MHz
- **OS:** WinCE 6.0 R3 core version / Android 2.3.4 Gingerbread
- **RAM:** On board 256MB Mobile LPDDR
- Storage:
  - On board NAND type 2GB for boot loader, OS & customer's APs
  - 1 x push-push type SD slot
- LCD: 5" industrial grade wide screen TFT LCD, 800 x 480 resolution (TREK-722)/ 7" industrial grade wide screen TFT LCD, 800 x 480 resolution (TREK-723)
- **Touch Screen:** 4-wire resistive with flat panel design

#### IO Function:

– Audio:

1 x built-in 2 W mono speaker

1 x MIC input, 1 x mono line-in, 1 x stereo line-out via high density cable – Video:

1 x CVBS input via high density cable

1 x Y/C input via high density cable

- USB Client: 1 x USB client I/F via USB mini-B connector with rubber door protection
- USB Host:

1 x USB host I/F via USB A-type connector (500 mA) with rubber door protection

1 x USB host I/F via high density cable with USB A-type connector (500 mA)

- Serial Port: 2 x 4-wire RS-232 via high density cable

#### - GPIO:

2 x isolated digital input (DI) which can wake up system via high density cable

2 x isolated digital output (DO) via high density cable

- CAN bus: 1 x CAN bus 2.0a/b with J1939 protocol via high density cable
- Function Key: 5 x programmable function keys with green LED

#### RF Function:

- GPS (Optional): Built-in 50 channel u-blox LEA-6S with internal antenna
- Bluetooth (Optional): Built-in Class 2 Bluetooth V2.1+EDR with internal antenna
- WWAN (Optional): Built-in Quad-band GPRS module Cinterion TC63i with internal antenna Built-in UMTS/HSPA+ module Cinterion PH8 with internal antenna Built-in CDMA/EV-DO module Sierra Wireless MC5728V with internal

#### Environmental Specifications:

- Operating Temperature: -20° C ~ 60° C & -30 ~ 70° C (7")
- Relative Humidity: 10 ~ 90% @ 40° C (non-condensing)
- Shock/Vibration: MIL-STD-810G, SAE J1455, Class 5M3 according DIN EN 60721-3-5
- Certificate: CE, FCC, CCC, UL, CUL, CB, E-mark

# 1.3 Dimensions

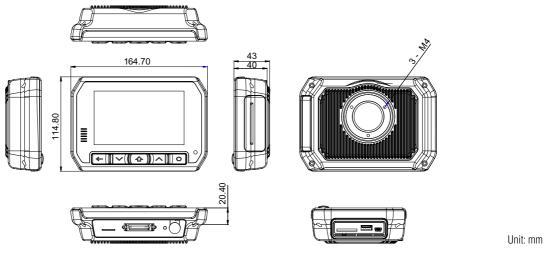

Figure 1.1 TREK-722 dimensions

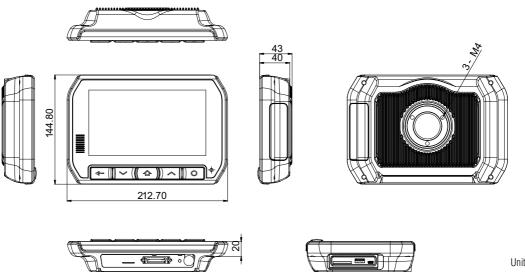

Figure 1.2 TREK-723 dimensions

Unit: mm

### **System Setup**

This chapter details system setup on TREK-722/723.

- Sections include:
- A Quick Tour of the Mobile Data Terminal
- Installation Procedures
- WinCE Satrtup Procedure

### 2.1 A Quick Tour of the TREK-722/723 Mobile Data Terminal

Before starting to set up the Mobile Data Terminal, take a moment to become familiar with the locations and functions of the controls, drives, connectors and ports, which are illustrated in the figures below. When the Mobile Data Terminal is placed inside truck glove cabinet or under the passenger's seat next to the driver, its front appears as shown in Figure 2.1.

Figure 2.1 Front view of TREK-722/723

Figure 2.2 Rear view of TREK-722/723

Figure 2.3 Bottom view of TREK-722/723

# 2.2 Installation Procedures

When you installing TREK-722/723, the first step will be connect the power and ignition correctly. TREK-722/723 power cable is designed to connect battery directly. TREK-722/723 can be switched ON/OFF by the ignition signal or its power button both.

#### 2.2.1 Connecting the Power Cord

Connect the three pin waterproof power cord to the DC inlet of TREK-722/723. On the open-wire end, one pin is reserved for positive voltage and is marked "+" which needs to be connected to the power "+" side; one pin is reserved for ground and is marked "-"; which needs to be connected to the power "-" side. And, one pin is reserved for the ignition signal with an "ignition" mark. There's independent "Shield" pin in power cable, please fixed its O-ring which besides of power connecter of TREK-722/723.

Figure 2.4 Power connector photo

Table 2.1: Pin Definition of Power Cord					
Pin	Definition	Color			
1	+	Blue			
2	Shield	Black			
3	-	Black			
4	Ignition	White			

# 2.3 WinCE Satrtup Procedure

Windows CE image can be loaded by two methods, first way is by SD storage card, and second way is by system on-board chip. Storage card is higher boot priority than on-board system flash chip. In BOOTLOADER criteria, it will first read the Windows CE image from external storage card. After download image done, booloader will burn image to on-board flash chip automatically. If external storage card is unavailable or no Windows CE image inside, BOOTLOADER will load the Windows CE image from on-board system flash chip. BOOTLOADER will load the Windows CE image from on-board system flash chip. BOOTLOADER copy Windows CE image to DRAM and launch WinCE from DRAM, whenever loaded by external storage card or system on-board flash chip.

8

# Hardware & Peripheral Installation

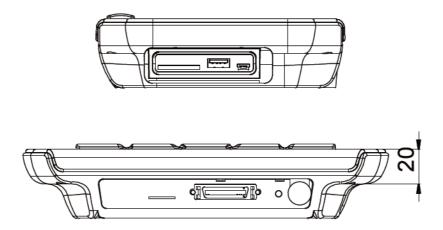

This chapter details the installation of hardware for TREK-722/ 723.

**Sections include:** 

- Installing the Storage Device and SIM Card
- Installing Optional Accessories

### 3.1 Installing the Storage Device and SIM Card

Users can install SIM card and storages (SD card) easily on TREK-722. SD card is the main bootable storage which has OS pre-installed from Advantech.

### 3.2 Installing Optional Accessories

Optional accessories, like RAM mount kits (RAM-MOUNT-02, RAM-MOUNT-07E) or other functional modules are available for purchase to complement TREK-722/723. All of standard RAM mount type mounting with M4 type screws only.

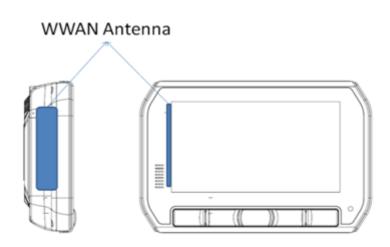

For RAM-MOUNT-02 datasheet, please go to http://www.advantech.com/products/search.aspx?keyword=RAM-MOUNT-02 For RAM-MOUNT-07E datasheet, please go to http://www.advantech.com/products/search.aspx?keyword=RAM-MOUNT-07E

# 3.3 Installing Standard Wireless Options

For TREK-722R-CBCEAXX, TREK-722R-GBCEAXX, TREK-722R-HBCEAXX, TREK-723-CBCEAXX, TREK-723R-GBCEAXX and TREK-723R-HBCEAXX, WWAN, Bluetooth and GPS modules are already installed inside of unit.

#### 3.3.1 WWAN (Internal Antenna)

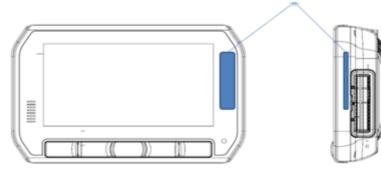

Position of internal WWAN antenna is shown as below blue area:

#### 3.3.2 Bluetooth (Internal Antenna)

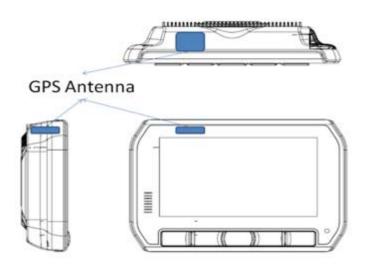

Position of internal Bluetooth antenna is shown as below blue area:

#### **Bluetooth Antenna**

#### 3.3.3 GPS (Internal Antenna)

Position of internal Bluetooth antenna is shown as below blue area:

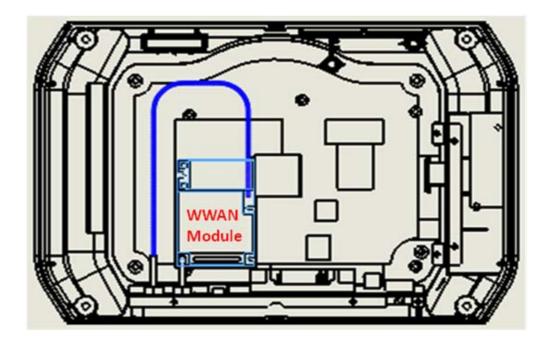

Note!

While installing TREK-722/723, make sure the surrounding doesn't block the blue area for optimal WWAN, Bluetooth and GPS performance.

### 3.4 Installing External Wireless Antenna Options

#### 3.4.1 HSPA and GPRS (External Antenna)

1. Make sure WWAN Module (PH8 or TC63i) and SMA cables have been installed in TREK-722/723.

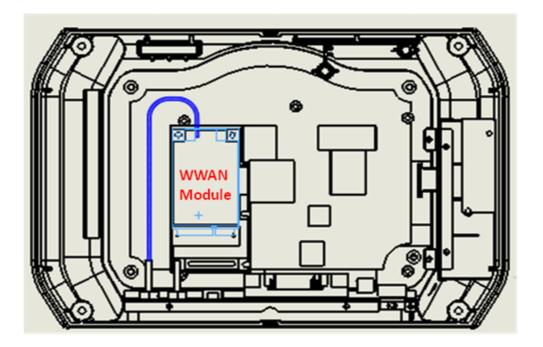

Chapter 3 Hardware & Peripheral Installation

2. Install WWAN antenna to below output.

#### 3.4.2 CDMA (External Antenna)

1. Make sure CDMA Module (MC5728) and SMA cable have been installed in TREK-722/723.

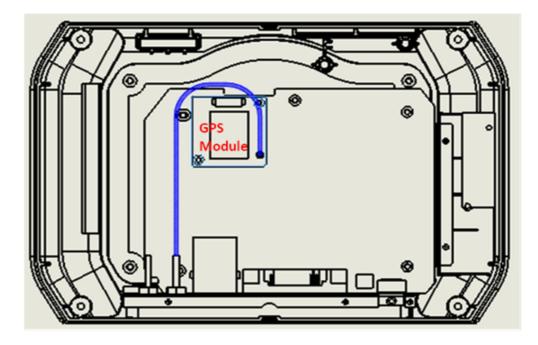

2. Install WWAN antenna to below output.

#### 3.4.3 GPS (External Antenna)

1. Make sure GPS Module (b-blox LEA-6S) and SMA cable have been installed in TREK-722/723.

2. Install GPS antenna to below output.

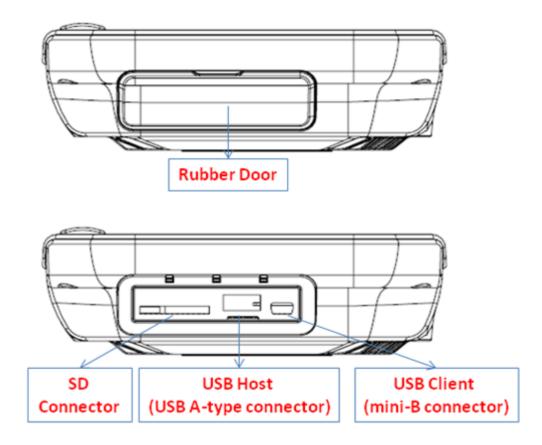

# **Pin Assignments**

This chapter explains pin assignments on the TREK-722/723.

## 4.1 Rear Side Connectors

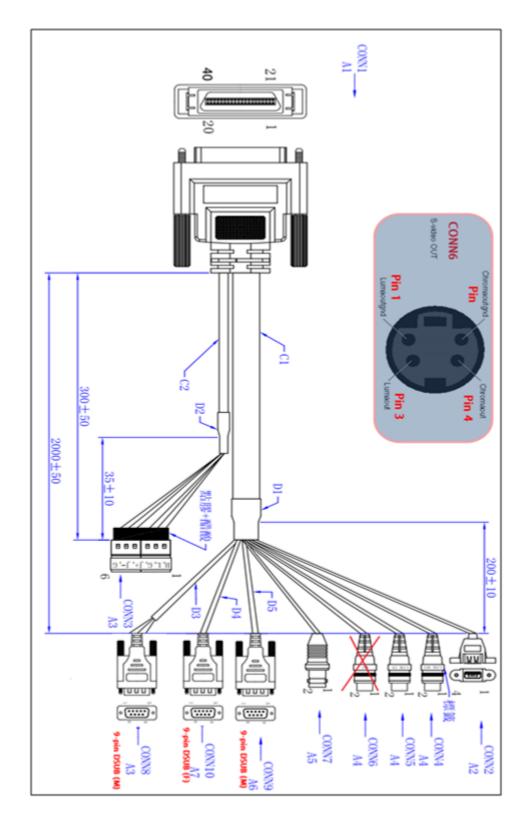

In order to access SD connector, USB Client (mini-B connector) and USB Host (USB A-type connector), please open the rubber door on the right side of TREK-722/723.

#### **Software Functionality**

This chapter details the Windows® 6.0 operating system on the TREK72x platform.

- Sections include:
- Introduction
- Windows® CE Startup Procedure
- Upgrade Procedure
- Utilities
- Network
- Application Program Development
- Windows® Embedded CE 6.0 Require Components

# 5.1 Introduction

The TREK72x platform is one embedded system with Windows® Embedded CE 6.0. The Windows® Embedded CE 6.0 is a compact OS that occupies less storage space or system resources compared with other operating systems such as Windows® XP. By its modular nature, it is possible to choose those functions that are useful for specific application. Not only reducing the system resources required, but also reduces start-up time. In the field of embedded applications, this is an appealing feature because the impact of downtime would be minimized.

Furthermore, the small storage space it needs makes OS on solid-state disk possible, which implies higher robustness to harsh environments.

Figure 5.1 Windows® Embedded CE 6.0 on the TREK72x platform

### 5.2 Windows CE Startup Procedure

Windows CE image can be loaded by two methods, first way is by SD / MMC storage card, and second way is by system on-board chip. Storage card is higher boot priority than on-board system flash chip. In BOOTLOADER criteria, it will first read the Windows CE image from external storage card. After download image done. If external storage card is unavailable or no Windows CE image inside, BOOTLOADER will load the Windows CE image from on-board system flash chip. BOOTLOADER copy Windows CE image to DRAM and launch WinCE from DRAM, whenever loaded by external storage card or system on-board flash chip.

# 5.3 Upgrade Procedure

Advantech release three files for TREK72x platform. MLO&EBOOT.NB0 is boot-loader and NK.BIN is WinCE6.0 image.

#### 5.3.1 Prepare SD card for bootloader

a) Disk format with HPUSBFW.EXE.

	D/MMC 1.00 (972 MB) (T.\)	114
	exame roo (ava mostrix)	
File system		
FAT32		
Volume labe	el	
TFAT

☐ Enabl	le Compression	
	e a DOS startup disk.	
	ing internal MS-DDS system Hes	
ey ut	ing DOS lystem files located at:	
I		-

Figure 5.2 Storage format tool

b) Copy file for upgrade image:

- 1. Copy MLO to sd card for TI CPU boot code.
- 2. Copy other file to sd card(refer to Section 5.3.2).

#### 5.3.2 Upgrade image:

a) Auto Upgrade:

- 1. Copy MLO to sd card first.
- 2. Copy Figure 5.3 file to sd card for TREK72x.

3. Plug sd card to TREK72x and power on.

4. The screen will show like next picture. It is will pass through some steps about format disk and copy file °letc. which automatically to finish upgrade except incorrect conditions.

```
Format Disk Name:DSK1
Format partition is finish
Copy \Storage Card2\Image\HLO to \Storage Card\HLO
COPY HLO Finish
Copy \Storage Card2\Image\EbootSD.nbO to \Storage Card\EbootSD.nbO
COPY EbootSD.nbO Finish
COPY NK.bin Finish
```

Figure 5.4 Upgrade finish

#### b) Manual:

If want to upgrade by manual must follow some steps.

- 1. Format disk with wince tools Storage Manager on the Control panel like Figure 5.4.
- 2. Copy files to Storage card that include MLO/EbootSD.nb0/NK.bin but MLO must be copied first. Relation files on the "Image" folder like a) Auto Upgrade.

# 5.4 Utilities

There are several useful utilities added in the standard Windows® Embedded CE 6.0

#### 5.4.1 Test Utility

The utility "AdvDiag.exe" is one integrated test tool, which includes the function validation for peripheral. You can use this tool to verify whether the peripheral function work or not. You just copy this utility to storage card and then launch from WinCE by double click it.

#### Main Function :

Item	Function Description
COMx (LOOPBACK)	Lookback test for COM3 & COM8
COMx <=> COMy	Two COM ports RS232 transmission
TOUCH SCREEN	Touch Screen function validation
Audio Play	Audio play function validation
Audio Record	Audio record function validation
USB Keyboard	USB Keyboard function validation
USB Mouse	USB Mouse function validation
Backlight Test	Backlight function validation
DIO Control	DIO function validation
PAUSE	Pause test process
REPEAT TEST	Repeat test process
Etc	

#### 5.4.2 Test Procedure

You should see a lot of test items in left zone after launch this utility. You can insert enough test items you want to right zone by pressing "Add" button. The test items in right zone will be executed. Also, you can remove test items from right zone by pressing "Remove" button.

After you add test items done, you can go function test by pressing "EXE ALL" button. To press "View Rpt" button, you will see the test result.

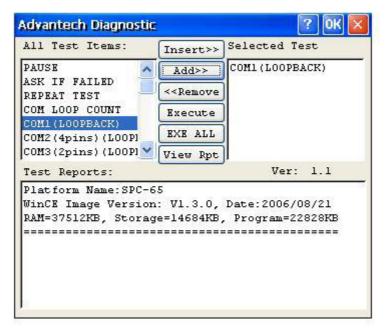

Figure 5.6 Test Utility

#### 5.4.3 Startup execution

The TREK72x platform has a useful function call "Startup execution". After the system boot up, the startup execution function would automatically perform. This function is useful for control system to do the initialization processes or some other procedures. In TREK72x platform, there are two ways to perform "Startup" function.

#### Method 1:

- 1. Create "startup" directory in SD/MMC storage card, USB disk.
- 2. Copy executable files to "startup" directory that is created by Step 1.

#### Example:

We copy two executable files "softreset.exe" and "Notepad.exe" in "Startup", and then reboot the system. After the system boot up, the two executable file would automatically execute.

#### Method 2:

- 1. Create "startup" directory in SD/MMC storage card, USB disk(Hard Disk).
- 2. Create a file called "startup.ini" in "startup" directory. Type in the commands you want to execute after boot up in that file.

#### Example:

Create "Startup.ini" in "\DiskOnChip\Startup" directory and reboot the system. The content of startup.ini was listed below:

\windows\tty.exe

\windows\registry.exe

After the system reboot, "\windows\ tty.exe" and "\windows\ registry.exe" would automatically execute. Be sure that the two methods are independent. It means they can be used simultaneously.

#### 5.4.4 Platform Setting

Platform Setting utility is an outstanding utility designed by Advantech Windows? CE software team. It is an integrated environment where user can get useful system information as well as configure favorite system settings and apply system control function on demand. Double click the icon of Platform Setting on the desktop. Platform Setting is also put on Control Panel. Following sections illustrate the functions of Platform Setting.

# Chapter 5 Software Functionality

### 5.4.4.1 General

It shows the memory information including DRAM and on board MMC. Platform name and version control are also put here.

eneral Display Au Platform Information Name: TREK-72x	Second Designment of the second	1	
Memory Size	Total	In Use	Free
DRAM (KB)	173460	13032	160428
INAND (KB)	1859716	39324	1820392
System Software —			
Windows CE 6.0	02.02.02	2012	2/03/14
Boot Loader	2.2.1	2012	2/03/06
Platform Setting	6.14.0145	2010	/07/08

Figure 5.7 General information

### 5.4.4.2 Audio

The Audio page is setting recorder that include "Microphone" and "Line In". The record function default select is "Line In".

Figure 5.8 Audio

### 5.4.4.3 Miscellaneous

The Misc page provides several functions as described below. The "Registry" block provides registry save and registry clean function. Pressing "Save" button, the registry settings will be saved to persistent storage as DISKONCHIP. Pressing "Clean" button, the registry setting will return to default settings. The "A.Sync" button invokes ActiveSync to the host computer. The Memory Management block will check if memory size needs to be allocated automatically during boot. Once this is checked, program memory will be allocated half size of memory, and storage memory will occupy the rest.

# 5.5 Network

# 5.5.1 Setup for HSPA and GPRS

TREK72x build in one 3G controller. It appears at "Control Panel/Network and Dialup Connections". User can configure its 3G support as follows:

a) Manual

- 1. Click "Start/Settings/Control Panel"
- 2. Double click "Network and Dial-up Connections"
- 3. If the TREK72x is a node of the LAN with 3G servers, it is now available.
- 4. Support Module have Tc63i/PH8/SierraWireless

Figure 5.9 3G via Ethernet

### b) Auto connect

Trek72x provide a "RF Module manager" for easy use 3G via Ethernet. About "auto dial up" is dial up from system startup. Next select item "auto connect" is dial up every condition of disconnect automatically.

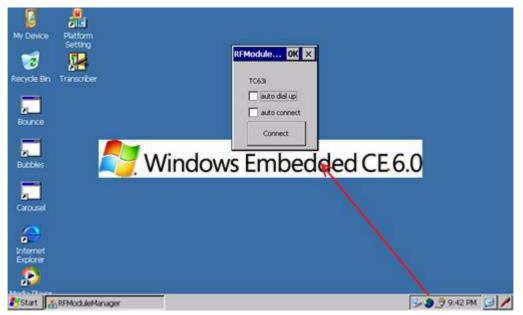

Figure 5.10 RF module manager

In order to fit every area to connect ISP(Internet Service Provider) must change content of "Extra Settings" like Figure 5.11.

evice Proper	rties	OK ×
Port Settings	Call Options	
Call Setup-		
Cancel	the call if not connected within 120 seconds	
Wait fo	r dial tone before dialing	
Wait	t for credit card tone 0 seconds	

Figure 5.11 ISP modern setting

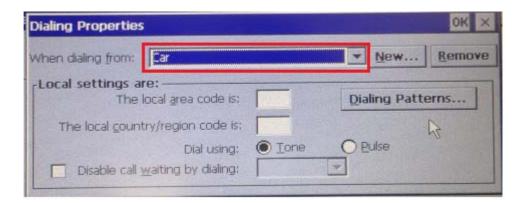

# 5.5.2 Example for Verizon CDMA Setup

1. On the next screen set the phone number to "#777" and click finish.

- 2. Double click on the Verizon icon.
- 3. Tap the dial properties, and use the drop down to select "CAR" and tap OK.

I-Up Connection		
22 Verizon		R
User Name:	Phone: Dial from: Car	#777
Dgmain:		Dial Properties
Save password	Conr	nect Cancel

Chapter 5 Software Functionality

- 4. Tap Connect
- 5. The next window will say "Dialing #777"

Verizon	Status	×
影	Dialing '#777'	
	Hide this message:	Hįde
	Cancel connection:	Cancel

6. If everything is OK, after a short time, you will hear a connect sound, and the Verizon status window will say "Connected"

Verizon S	Status	×
32	Connected	
	Hide this message:	Hide
		Disconnect

**Note!** Fill in the "extra settings" field. Picture below for reference.

ort Settings Call Options	
Call Setup	III - COL
Cancel the call if not connected within 120 seconds	
✓ Wait for dial tone before dialing	
Wait for credit card tone 0 seconds	

# 5.6 Touch Calibration

Want to calibrate touch panel that can be searched on "stylus property". Press recalibrate button and follow guide to finish recalibrate touch. If finish recalibrate suggest you to save registry with "5.4.4.3 Miscellaneous" keep result of touch panel calibration

Figure 5.12 Touch panel calibration

# 5.7 Application Program Development

The TREK72x is bundled with built-in Windows® Embedded CE 6.0 operating system. In real applications users need to execute various application programs on it. However, unlike its other family, the Windows® Embedded CE 6.0 is a hardware-dependent operating system. That is to say, Windows? Embedded CE 6.0 application programs are only portable in the source code level. Users must rebuild the runtime file for a different Windows® Embedded CE 6.0 platform even though the source code may not be changed at all.

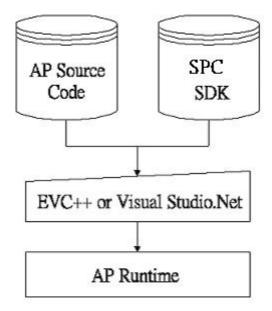

## 5.7.1 PC System requirements

- Intel® Pentium-90 CPU or more advanced
- Microsoft® Windows® 2000 Professional or Windows® XP
- Microsoft® eMbedded Visual C++ 4.0 or Virtual Studio 2005
- Platform SDK for TREK72x
- 64MB DRAM
- CD-ROM drive
- Monitor with VGA resolution at least
- Mouse
- 200MB free hard disk space at least
- TREK72x platform
- Let the host PC and TREK72x connect on the same USB1.1 to do kernel debugging if necessary
- USB cable (bundled in the standard TREK72x)

# Chapter 5 Software Functionality

# 5.7.2 Building Windows CE program

By the platform SDK bundled with the standard TREK72x, users can build the Windows CE runtime application program by the eMbedded Visual Tools.

### Figure 5.13 Flow-chart of Building Windows® Embedded CE 6.0 runtime

## 5.7.3 How to install SDK

For example copy Platform SDK file "\*\*.msi" to your PC, and launch it. You can install SDK by steps.

1. Launch Platform SDK file, and then tap Next button.

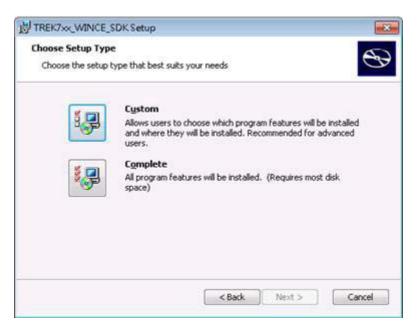

2. Accept License Agreement and go next.

# 5.7.4 Running IMC SDK CE Demo Test

### 5.7.4.1 Core Function Test

To access Core Function Test, click

IMC\_SDK\_V2/sample/CE/TREK\_722\_Sample\_Code\_CORE\_FUNCTION/ TREK\_722\_Sample\_Code\_CORE\_FUNCTION/obj/Debug and execute TREK\_722\_Sample\_Code\_CORE\_FUNCTION.exe

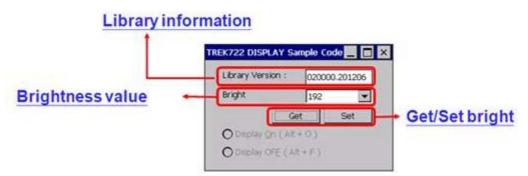

### 5.7.4.2 DIO Test

To access DIO Test, please click IMC\_SDK\_V2/sample/CE/TREK\_722\_Sample\_Code\_DIO/ TREK\_722\_Sample\_Code\_DIO/obj/Debug and execute TREK\_722\_Sample\_Code\_DIO.exe

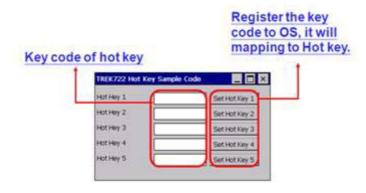

### 5.7.4.3 Display Test

To access Display Test, please click IMC\_SDK\_V2/sample/CE/TREK\_722\_Sample\_Code\_DISPLAY/ TREK\_722\_Sample\_Code\_DISPLAY/obj/Debug and execute TREK\_722\_Sample\_Code\_DISPLAY.exe

### 5.7.4.4 Hotkey Test

To access Hotkey Test, please click IMC\_SDK\_V2/sample/CE/TREK\_722\_Sample\_Code\_Hot\_key/ TREK\_722\_Sample\_Code\_Hot\_key/obj/Debug and execute TREK\_722\_Sample\_Code\_Hot\_key.exe

### 5.7.4.5 I<sup>2</sup>C Test

To access I<sup>2</sup>C Test, please click IMC\_SDK\_V2/sample/CE/TREK\_722\_Sample\_Code\_IIC/ TREK\_722\_Sample\_Code\_IIC/obj/Debug and excute TREK\_722\_Sample\_Code\_IIC.exe

### Library information

# 5.7.5 Running your application programs

After you implement application code, you should choose Advantech SDK to compile.

# 5.7.6 SUSI library for application program

TREK72x is targeted to be the embedded device for system integrator. System integrator usually access platform relative IO, like backlight control, brightness control, etc. Advantech especially provide one SUSI static library to system integrator. SUSI library includes some useful APIs. System integrator just adds it to their application project, and then they can use SUSI library functions.

Note: about SUSI library detail was showed in [SUSIV3.0RISC User Manual.doc]
