### Introduction

Doorside Paper can provide real-time ward information to be displayed at the door. The information can be patient information, bed information, nurses, ward status, etc., and customize the information you want to display. In our backend, we provide a friendly interface for users to customize the layout and dynamic parameters; at the same time, it also provides API to integrate with other systems, such as the hospital's HIS system. Make information more real-time and convenient.
