## 8K UHD Hospitality Box Computer with Intel 11th Gen Processor

DeviceOn/iService

### Features

- Equipped with DeviceOn/iService software for remote device management
- Supports triple display to extend a visible range and provide the detailed video contents
- Superior video quality: support up to 8K UHD resolution
- Built-in a TPM 2.0 chip for data encryption enhancement
- Support two M.2 2280 SATA SSD expansions for RAID 0/1 function
- Can be integrated with optional WiFi and Bluetooth combo module
- Supports Windows 10 IoT LTSC 2021, Windows 11 IoT, Linux, or Android 12.0
- An exclusive x-type thermal isolation top cover ensure safe installation and user touch

### Introduction

Advantech UBX-110 is an ultra-compact hospitality box computer that is used for offices, retail applications, etc. It features Intel 11<sup>th</sup> gen processor to boost system performance and working efficiency. The UBX-110 enables 8K UHD video resolution by the USB-C output that delivers vivid and high-quality A/V experiences. It also supports TPM 2.0 and RAID 0/1 function to offer complete system security and data protection solution. It is an ideal mini PC for retail applications.

# DeviceOn/iService

## Unified Remote Device Management Software

### Features

- Supports Advantech devices equipped with Windows, Android, and Linux OS
- Flexible device, location, user, and permissions management
- Enables remote monitoring and control of hardware, software, and peripherals
- Supports over-the-air (OTA) firmware and software updates
- Ensures quick, easy, and secure device onboarding
- RESTful APIs for third-party system integration

### Introduction

Advantech's DeviceOn/iService is a next-generation unified device management solution based on the WISE-DeviceOn platform. Designed to enable centralized monitoring and remote management, DeviceOn/iService supports Advantech devices equipped with Windows, Linux, or Android operating systems. The software also supports the management of applications and integrated peripherals, such as a barcode scanner, card reader, camera, and printer. Users can remotely access and control connected devices, take screenshots, rollout OTA upgrades, and use remote desktop capabilities for troubleshooting from any location at any time. Moreover, DeviceOn/iService supports batch operations to facilitate the management of multiple devices simultaneously for easy and convenient device configuration and deployment.

### Total Management

#### Devices & Hardware

- Windows, Linux, Android
- Hardware, storage, battery

#### Software & Peripherals

- Software monitoring & access
- Screens, USB devices, printers

#### Open for Expansion

- Peripheral integration
- Open APIs for integration

### Remote Access

#### Real-Time Monitoring

- Connection/hardware status
- Software/peripheral status
- Failure notifications

#### Remote Controls

- Power controls
- Audio, backlight controls
- Software controls

#### Troubleshooting

- Screenshots
- Remote desktop support

### Operational Efficiency

#### OTA updates

- System/software updates
- File repository management
- App store

#### Batch Controls

- 1-to-many batch reboot, etc.
- Time-saving tasks

#### Setup Booster

- Software/peripheral watchlist
- Roles, rule templates

Note: Some functions may vary according to the product
