# UTK-3815

Compact & Highly Customizable Kiosk

Features

- Stylish, compact design saves installation space
- Simple modular assembly for easy maintenance
- Compatible with diverse processors to support various applications
- Flexible configuration according to usage requirements
- Suitable for Advantech's Design-to-Order services
- Supports integration with optional peripherals

Introduction

UTK-3815 is a customizable, modular, all-in-one kiosk aimed at a wide range of self-service applications. The modular design allows the Box PC and monitor size to be easily customized according to customers' usage requirements. Additionally, the system can be integrated with diverse peripherals, including a payment module, barcode scanner, printer, LED status indicator, or camera, to support specific applications. Overall, the ability to flexibly configure UTK-3815 reduces development time and costs, and ensures easy deployment in a variety of operation environments.
