Introduction

WISE-1510 is M2.COM standardized IoT Sensor Node integrated with ARM Cortex-M4 Processor and LoRa transceiver. LoRa technology is the great for Low-Power Wide-Area Network (LPWAN) Applications such as Smart Cities, Agriculture, Metering, Street Lighting and Environment Monitoring. With optimization on the power consumption and wide range, your sensors or applications with low data rate requirement can be achieved years battery lifetime and kilometers long distance connection. Based on the deployment, WISE-1510 is flexible to support either public LoRaWAN network or private LoRa Eco-system.

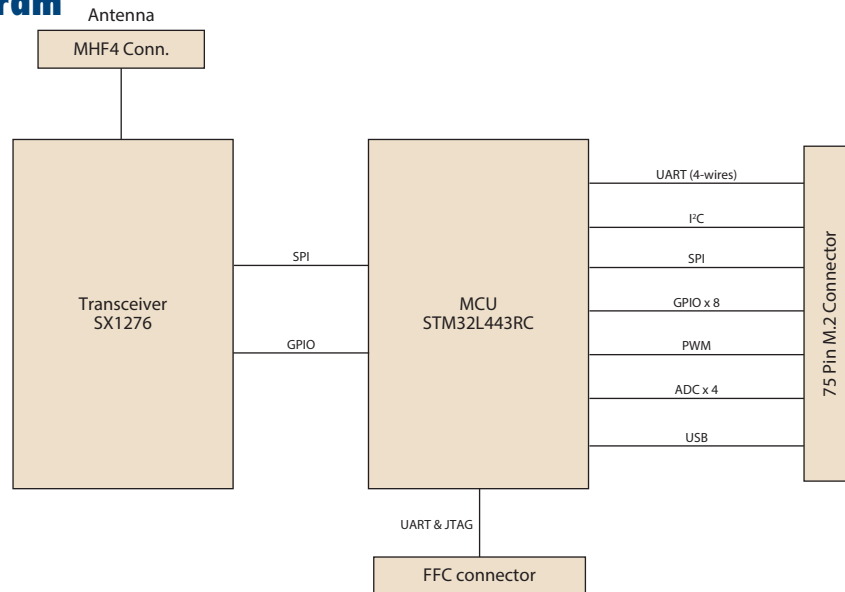

Advantech WISE-1510 also provide multi-interfaces for sensor and I/O control. With ARM mbed embedded microprocessor operating system and add-on software stacks, it's convenient to support IoT communication protocols including LWM2M, CoAP and MQTT with WISE-3610 LoRa IoT Gateway. Data can be quickly and easily acquired and transformed into a different format to communicate with WISE-PaaS, ARM Pelion or other cloud services. Developer can build their application backbone faster and focus on their applications, value-added services.
